European Training Requirements for GP/FM specialist training, 2018

It is our hope that this document can be used as an inspiration and guidance for all countries to bring their GP/FM specialist education and training to the highest standards, warranting registration of GP/FM as a medical specialty. The patients in GP/FM across Europe deserve excellently trained specialists in GP/FM.

European Training Requirements for GP/FM specialist training, 2018

+

+

- Better and more relevant (to patients and GPs) education
- of GPs across Europe
- GP training comparable to other specialist training
- Recognition of GP/FM as a specialty in line with other medical specialties in EU – and in non-EU countries
- And finally: better conditions for GPs

WONCA Networks and SIGs

It's all about

- *Collaboration*
- *Sharing experiences, thoughts - and dreams*
- *Creating a better and stronger GP for European patients*
- *And: many initiatives also have relevance outside Europe*
